#### – Explanations

1. Tiger Enterprise includes; Commercial Systems Management, Materials Management, Purchasing Management, Sales and Distribution, Financial Management, Asset Management, General Ledger, Production Management, Master Production Scheduling, Material Requirements Planning, MRP Net Change, Capacity Scheduling, MPS , Quality Control, Cost Accounting, Inflation Accounting, Distribution Management (shipping, packaging), Configuration Management, Delivery Date Determination, Material Properties and Class Structure, Size Tracking Serial-lot, Inventory Location Tracking, Request Management, Bid Management (purchase/sale), Campaign, Additional Tax, Credit Card, collateral Management, Admin Console, Workflow, GoGaranti, Project Tracking, Practice Statement Reports, Report Generator and Interface Customization Tool.
2. Tiger Enterprise main package and modules are sold project-based due to different requirements.
3. Payroll Plus 100 Employees for Tiger Enterprise and 1 year LEM are given for free.
4. Microsoft® SQL Server® 2012 R2/2014 Express Edition can be used as database with Tiger Enterprise main packages. Microsoft® SQL Server® 2012 R2/2014 Express Edition supports databases that have maximum 1 CPU, 1 GB memory and 10 GB size. Microsoft® SQL Server® 2012/2014 Runtime and Full Use can be purchased from Logo's authorized business partners.
5. User increases that are added onto basic packages individually or consecutively to increase users.  
Example: 6 users are obtained when "+5 users" increase is installed onto Tiger Enterprise main package. Then "+5 users" is installed on top in order to get 11 users. There is no need to buy any user increase if it is not specified in the list for the options that are used with the sets.
6. Navigator Smart;
  - Main package includes 1 user.
  - All Navigator Smart licenses are included in general LEM calculation.
  - During transition from Smart to Navigator Smart, user increment purchases are calculated by transition prices while transiting. User increasement purchases after transition are calculated by new list prices.

#### - Options

1. Foreign trade and Import & Export modules are included.
2. Logo Retail is sold as a module and works integrated with Tiger Enterprise main package.
3. B2B and B2C Applications:
  - LogoConnect B2B module includes the integration functionalities from business to business. It gives services up to 5 companies on the same database. For more number of company requests, a project proposal should be given to Logo regional offices.
  - LogoConnect B2B works in local (data transfer is supported by user) or can be used by getting service from authorized Logo business partners (through Logo servers). While It is recommended to work locally when transferring data between same group companies, it is more efficient to work through Logo servers when having a disorganized branch structure or transferring data between 3rd parties.
  - LogoConnect B2B works locally or can be used by getting service from authorized Logo business partners.
4. Please check the Vertical Solutions price list for more integrated solutions working with Tiger Enterprise. Vertical solutions are developed by Logo Solution Partners.

#### – LEM Explanations

1. LEM price is calculated by taking 14% of all current license price of products, user increase and options. 10% late fee is added on top of it if LEM is not renewed on time.
2. Customization Tools are not included in LEM calculation.

#### – Product Transition Explanations

1. License price difference is applied while upgrading from Tiger Plus to Tiger Enterprise. License price differences is calculated based on the main package + number of users base.
2. Invoice of the product that is upgraded should be delivered to Logo.

**- Payroll Plus**

1. The number of users for Payroll Plus is 10. In cases where more users are needed, user increase should be obtained.
